

PRESS RELEASE

Osnabrück, 12.04.2021

Technocell Dekor launches five new trend colours

Technocell Dekor is adding five new colours to its LEVEL 25 trend colour collection. From soft green to modern grey - the new décor paper trend colours 2021/2022 create a feeling of harmony. With this collection update, the décor paper manufacturer shows where the colour trends in interior design lie. In addition, the décor specialist offers its customers and interested parties a new service with the Colourkolleg Workshop.

Five new décor paper colours now complement Technocell Dekor's LEVEL 25 trend colour collection. The trend colours have the melodious names Aurora Green, Modern Grey, Sunrise Blue, Light Fawn or Desert Rose and are available immediately.

"No matter where we spend our days and no matter what our mood, our lives are shaped by colour," says Stephan Igel, Chief Sales Officer (EMEA) of the Felix Schoeller Group. "Each of our five new colours brings more depth and character to its environment," Stephan Igel adds to the décor paper manufacturer's trend update.

The new décors can be viewed and ordered as samples at <https://dekor.felix-schoeller.com/level-25>, just like all other LEVEL 25 trend colours. If the décor you are looking for is not in the range, the experienced Technocell décor colour experts will be happy to fulfil any colour request you may have.

Colourkolleg Workshop

The new workshop will introduce the world of intense coloured décor papers to customers and interested parties. A strong focus is placed on the exchange of knowledge regarding current colour trends in interior design. Participants will gain exciting insights into the trend scouting process and the creation of the LEVEL 25 collection.

Interested parties can register at www.technocell-dekor.com. The workshop is offered digitally or as a face-to-face event.
