

# TECHNOKOLLEG

THE DECOR ACADEMY

LET'S  
ACHIEVE MORE –  
TOGETHER!

**Are you striving for the perfect product, made in an efficient process and at the optimal cost? We are here to help you. Because success comes from knowing what is possible, our objective at Technocell Dekor is to share relevant knowledge with you. Technokolleg is continuously updated and remains the workshop for your success.**

In our Technokolleg workshop modules, experienced specialists will introduce you to our world of decor papers, solutions and services, share their technical expertise and show you what they can do for your business. The topics covered in our workshops are as follows:

- Manufacturing, structure and processing of decor paper
- Colour analysis, colour matching, colorimetric measurement and systems, opacity
- Digital printing – from technology to matching papers

This in-depth knowledge will enable you to take your business to new levels of performance.

**Technocell Dekor**

Solutions first.

## LEARN MORE – WITH MODULES TAILORED TO YOUR NEEDS

Technokolleg is a completely flexible seminar that you can customise to your needs. You can choose as many subjects as you wish. This flexibility doesn't stop there. We can either conduct a seminar at your closest Technocell plant or regional office or, conveniently, at your location.

WOULD YOU  
LIKE TO  
LEARN MORE?

## IT'S YOUR CHOICE – OUR THREE TECHNOKOLLEG MODULES:

### 1 Manufacturing, structure and processing of decor paper

**Manufacturing:** Learn about the raw materials used in decor paper production, how they interact and the machines that make them.

**Processing:** Gain an understanding of what happens during gravure printing, impregnating and laminating – and much more.

**Structure:** Learn what influences the structure of decor paper and what processes are used to achieve the results you need.

### 2 From colour analysis and colour systems to colorimetry

**Colour matching:** Explore colour matching, become familiar with the equipment and additives used in the process and learn how to analyse colour.

**Colour systems:** Learn all about colour systems and colour catalogues and how and where they are used.

**Colorimetric measurement:** Learn how the eye perceives colour and about colorimetric measurement methods and their uses.

**Opacity:** Learn everything you need to know about opacity and the factors and conditions that influence it.

### 3 Digital printing – from technology to matching papers

**Printing technology:** Learn about the motivation for and benefits of digital printing. You will also get an up-to-date overview of printing machines, their technologies and the printing inks.

**Decor papers for digital printing:** Become familiar with the basic principles of inkjet paper printing and learn which paper best goes with the laminate product. Also gain an understanding of the environmental impact of digital printing.

## WE LOOK FORWARD TO SERVING YOU.
